WORK EXPERIENCE

Rightpoint   **Jan 2023 - Present**
Solutions Architect Consultant

- Holds the single point of accountability for a project's technical health

- Excels in both the technical aspects and the management aspects of the project - estimation, de-escalating drama, and mitigating risks/issues.

- Understands a project in its entirety from a holistic point of view.

- Maintains strong client relationships with both technical leadership & stakeholders.

- Holds a comprehensive understanding UI/UX and technical industry standards.

Dec 2020 - Dec 2023

Lead Engineering Consultant

- Responsible for FE architectural design, decisions, and organization.

- Takes an active role in guiding junior developers in best practices and javascript fundamentals.

- Works with directors to write comprehensible agile backlog items with clear direction.

- Frequently writes technical documentation for other project maintainers to consume.

- Perfected the ability to context switch between tasks to make myself available for others.

Aug 2016 - Dec 2020

Sr. Software Engineering Consultant

- Lead a recent engineering effort with React.js for a major airline as part of their public customer-facing rebrand. As a trusted member, one of 6 engineers granted merge capabilities within their organization.

- Implemented numerous single and multi-page web applications using React.js and related JS libraries.

- Effective communication with technical and non-technical clients daily; familiar with Scrum methodologies.

- Conducted and participated in internal tech-time - a platform for open technical discussion on various topics.

- Offered extensive mentorship to novice engineers in both technical code reviews and pair programming.

Associate Engineering Consultant

- Team player and trusted colleague in executing web solutions for multiple clients in various industries including banks, higher education, and finance; writing React.js, Backbone.js paired with charting libraries.

- Created pixel-perfect, responsive web applications and interfaced them with RESTful web APIs.

- Understands the importance of unit testing.

Bursteways Technologies   Jan 2015 - Present
Fullstack Software Consultant

- Worked directly with business owners, providing professional consulting services focused on technology for businesses seeking technology guidance.

- Developed 4 full-stack successful custom software solutions for 3 clients.

- Authoring opens-source articles and code involving topics such as blockchain, software, and consulting best practices.

BonfireTides   Jan 2014 - Dec 2014
Web Developer

- Developed page layouts based on mock designs for various clients using technology such as Wordpress PHP, Ruby on Rails, and jQuery. Developed a mobile application on Titanium Appcelerator (Android + iOS).

- Tested website performance and verified quality assurance in development and production environments.

Tuatara Corp.   Apr 2012 - Dec 2013
Intern

- Manipulated raw XML and executed Python scripts to output to semantic HTML markup.

- Styled the HTML output using CSS for production environments.

EDUCATION

University of Massachusetts Dartmouth   *Sept 2007 - May 2011*
Bachelor of Science: Marketing & Sales
