WORK EXPERIENCE

Rightpoint   **Jan 2023 - Present**
Solutions Architect Consultant

- Holds the single point of accountability for a project's technical health

- Excels in both the technical aspects and the management aspects of the project - estimation, de-escalating drama, and mitigating risks/issues.

- Understands a project in its entirety from a holistic point of view.

- Maintains strong client relationships with both technical leadership & stakeholders.

- Holds a comprehensive understanding of the UI/UX and technical industry standards.

- Understands the importance of AI technology and the way it plays a role in modern software solutions.

                                                                                                    Dec 2020 - Dec 2023

Lead Engineering Consultant

- Responsible for FE architectural design, decisions, and organization.

- Takes an active role in guiding junior developers in best practices and fundamentals.

- Works with directors to write comprehensible agile backlog items with clear direction.

- Writes technical documentation for project maintainers and/or stakeholders.

- Strong ability to context-switch between tasks to make himself available to others.

                                                                                                    Aug 2016 - Dec 2020

Sr. Software Engineering Consultant

- Lead an engineering effort with React.js for a major airline as part of their public customer-facing rebrand. As a trusted member, one of the 6 engineers granted merge capabilities for their organization.

- Implemented numerous single and multi-page web applications using React.js and related JS libraries.

- Effective communication with technical and nontechnical clients daily; familiar with Scrum methodologies.

- Conducted internal tech-time presentations on various topics; TRPC, Monorepo, etc.

- Provided extensive mentorship to novice engineers in both technical code reviews and pair programming.

<div align="right">**Jan 2015 - Aug 2016**</div>

Associate Engineering Consultant

- Team player and trusted colleague in executing web solutions for multiple clients in a variety of industries including banks, higher education, and finance; writing React.js, Backbone.js paired with charting libraries.

- Created pixel-perfect responsive web applications and interfaced them with RESTful web APIs.

- Understands the importance of unit testing.

Bursteways Technologies <div align="right">**Jan 2015 - Present**</div>
Fullstack Software Consultant

- Works directly with business owners, providing technology consulting services seeking technology guidance.

- To date, developed 5 successful custom software solutions for 3 clients.

- Creating open-source articles and code that include topics such as blockchain, software, and consulting best practices.

BonfireTides <div align="right">**Jan 2014 - Dec 2014**</div>
Web Developer

- Developed page layouts based on mock designs for various clients using technologies such as Wordpress PHP, Ruby on Rails, and jQuery. Developed a mobile application on Titanium Appcelerator (Android + iOS).

- Tested website performance and verified quality assurance in development and production environments.

Tuatara Corp. <div align="right">**Apr 2012 - Dec 2013**</div>
Intern

- Manipulated raw XML and executed Python scripts to output to semantic HTML markup.

- Styled the HTML output using CSS for production environments.

EDUCATION

University of Massachusetts Dartmouth <div align="right">*Sept. 2007 - May 2011*</div>
Bachelor of Science: Marketing & Sales
